

AURORA (T 07 L6)

Season: Late Season
Main characteristic/s: Outstanding fruit quality
Breeder: Az. Agr. Molari & Gatti di Molari Gilberto, Italy

Characteristics of Aurora (T 07 L6)

- High productivity
- Excellent flavour and shelf life
- Bright orange-red colour
- Outstanding fruit quality

Cropping Season

In Northern Italy cropping starts in early June for floricanes and in late August for primocane production.

Fruit Quality

The berries are bright orange-red in colour, with excellent flavour and shelf life.

Fruit Yield
Aurora has a high yield potential, with a short and concentrated harvest period.

Plant Characteristics

The plant has an upright, erect habit with strong and vigorous, slightly spiny canes. Aurora is well adapted for both fresh potted plant and long cane production systems.

Disease Resistance

Aurora is tolerant to the main diseases and pests.

Plant Supply

Aurora is protected under Community (EU) Plant Variety Rights Application No. 2017/0816. The propagation and sale of plants, or parts of plants, of Aurora without a licence is prohibited. Aurora is available from the following licensed propagators:
