

MARIGUETTE® (MARIONNET 99)

Season: Everbearing

Main characteristic/s: Very sweet flavour, excellent shelf life

Breeder: Marionnet SAS, France

Characteristics of Mariguette® (Marionnet 99)

- Very sweet flavoured berries with a pleasant fragrance
- High Brix levels
- Excellent shelf life and berry firmness
- Attractive, glossy bright red berries
- High fruit yields

Cropping Season

Mariguette® is an everbearing strawberry cropping from the beginning of July.

Fruit Quality

The berries are large and oblong in shape, orange-red in colour with a very shiny skin finish. The flavour has good sweetness with a high Brix index and a subtler fragrance than Mara des Bois. The shelf life and berry firmness are excellent.

Fruit Yield
Mariguette® has a high yield potential, better than Charlotte, particularly in spring production from a tray plant.

Plant Characteristics

Plants are fairly robust with cupped spoon-like leaves. Mariguette® is well adapted to substrate production using tray plants.

Plant Supply

Mariguette® (Marionnet 99) is protected under Australia PBR Application No. 2016/380; Canada PBR Grant No. 5842; Morocco PBR Application No. 526/14. The propagation and sale of plants, or parts of plants, of Mariguette® without a licence is prohibited. Only Propagation Licence holders can propagate and receive propagation grade material (and not Sales or Growing-on Transformation Licence holders). Mariguette® is available from the following licensed propagators:
