SATINE

Season: Early season
Main characteristic/s: Primocane, excellent quality fruit
Breeder: Marionnet SAS, France

Characteristics of Satine
- Aromatic flavour
- High fruit yield
- Very good shelf life
- Tolerant to the main raspberry diseases

Cropping Season
Cropping season is 8 to 10 days later than Polka.

Fruit Quality
The fruit has a good size, averaging. 4.5g, with a uniform, short conical slightly rounded berry. The berries are a light colour and very glossy with a good aromatic flavour. They have a very good shelf life and firmness. Fruit Yield
Very good fruit yields achieved, higher than Polka.

Plant Characteristics
The plants are vigorous with laterals produced on the whole cane. Canes are very robust with an upright habit through the cropping season.

Disease Resistance
Satine is tolerant to the main raspberry diseases and pests.

Plant Supply
Satine is protected under Community (EU) Plant Variety Rights Grant No. EU 43222. The propagation and sale of plants, or parts of plants, of Satine without a licence is prohibited. Satine is available from the following licensed propagators:
